

La Salle Premià

Scala,
Florence

Presentation

Location

- We are situated in a privileged location, next to the sea and very close to Barcelona.

Type of School

- La Salle Premià is a privately-run school that is in the process of accreditation as a "Green School".
- We have around 900 students ranging in age from 3 to 16 years old.

So far, we have implemented the following sustainable actions:

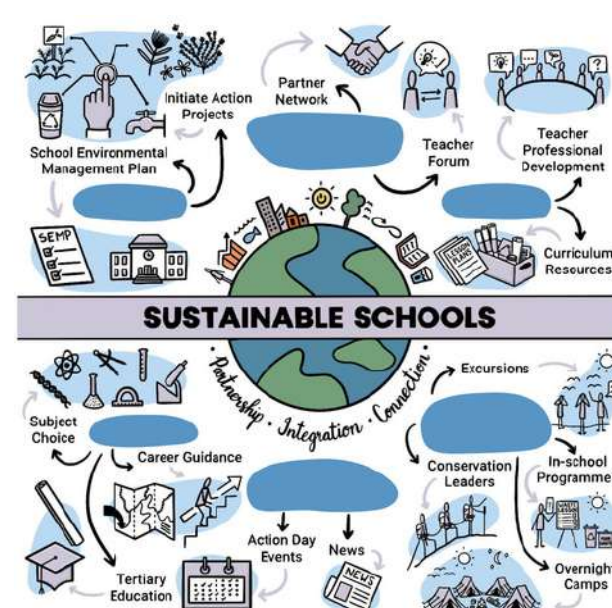

Curriculum deployment based on sustainable objectives

Our curriculum focuses on project-based work within the Sustainable Development Goals approach.

Environmental Education

In La Salle Premià Environmental Education starts from the age of 6.

Our aim: To become a sustainable school

Our lines of action are taken from a strategic project spanning 3-4 years: Towards a sustainable school committed to the educational community.

Committed to European initiatives

Our Erasmus projects are linking areas such as robotics and sustainability to enhance the classroom environment.

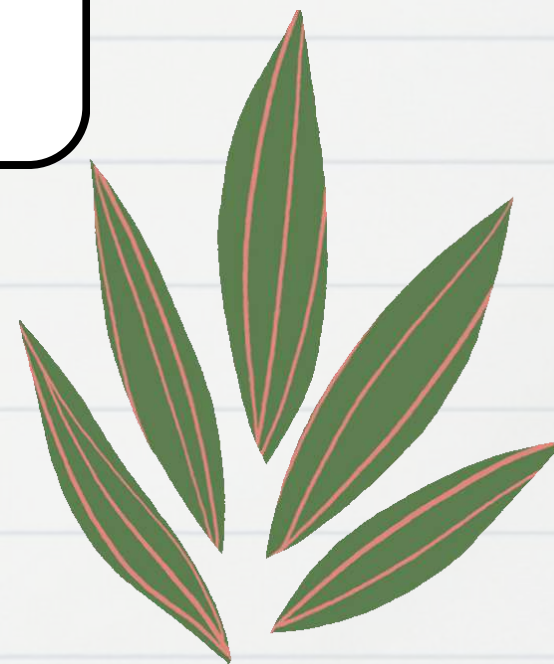

And, obviously, we need to stay motivated!

Teacher Professional Development

We have a core team of teachers that are driving training sessions for colleagues on such initiatives.

Small Steps to a Giant Improvement TAKE ACTION!

Our School Environmental Management Plan 1:

Switching to recycled paper

We are committed to recycled paper for photocopiers and classroom use.

Eliminating plastic bottles

You'll find different hot and cold-water dispensers in both buildings, in several rooms.

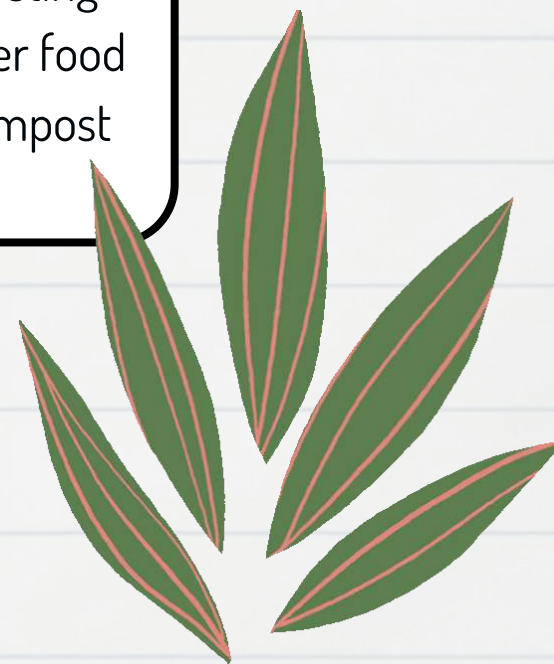

Recycling stations in the corridors

We have paper and battery recycling points in different corridors.

Composting for the garden

We also have an onsite composting program reusing leftover food waste and water as compost for the garden.

Small Steps to a Giant Improvement

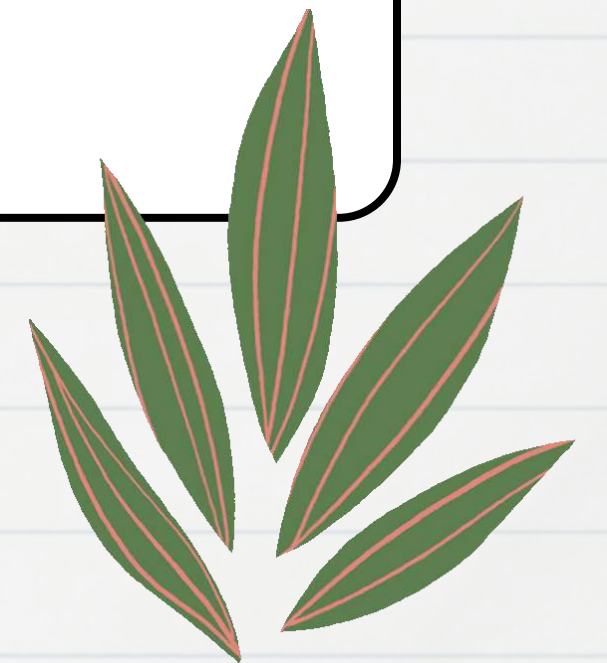

TAKE ACTION!

Our School Environmental Management Plan II:

Installation of solar panels

By installing solar panels, we generate our own renewable electricity and reduce carbon footprint.

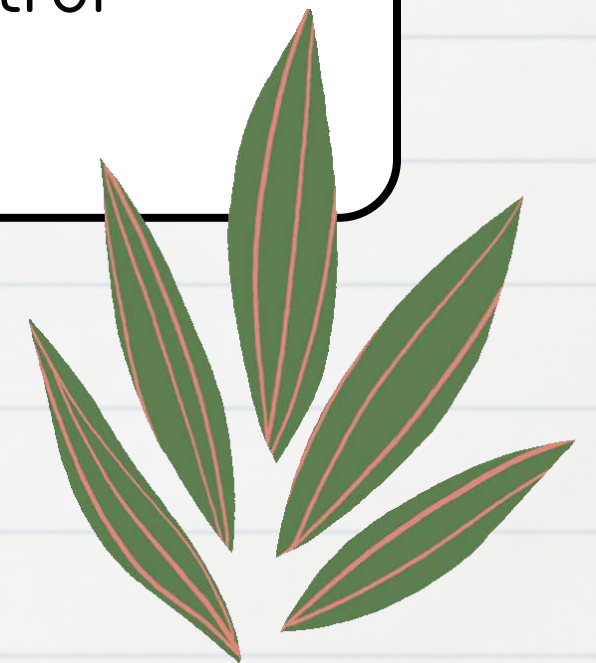

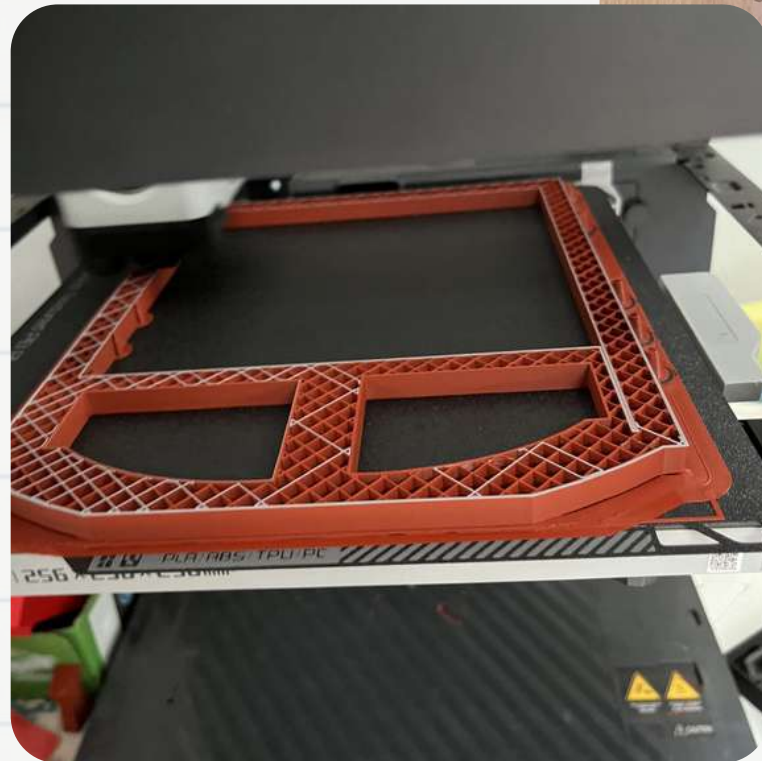

Small Steps to a Giant Improvement TAKE ACTION!

Our School Environmental Management Plan III:

Students' projects

Our students are developing projects related with one main objective, a better and greener school: hanging plants on windows ledges and traffic lights to control noise.

Thanks for your attention!
We invite you to come and visit us.
